

Key data for Mozambique

Existing rates of: **Wasting:** 6.1% **Stunting:** 43.1% **Proportion of population underweight:** 15.6%

Source: Government of Mozambique (DHS, 2011)

Strong Performance

- The Government of Mozambique has ensured tenure security for rural populations. Land titling is common and land markets function well. Policy promotes equitable access to common property resources.
- The Government encourages varied agricultural research and extension services, and local farmer organisations are involved in setting policy priorities. The extension system is effective and properly reaches out to poor farmers. Government policies, strategies and mechanisms seek to ensure gender equity in access to extension services.
- The National Nutrition Policy/Strategy identifies time bound nutrition targets and a multisectoral and multistakeholder policy coordination mechanism has been set up.
- The Government has fully enshrined the International Code of Marketing of Breastmilk Substitutes into domestic law.
- The Government of Mozambique promotes complementary feeding practices and has achieved two high doses of vitamin A supplementation for 99% of children in 2015.
- In Mozambique 90.6% of women aged 15-49 were visited at least once during pregnancy by skilled health personnel in 2011.

Areas for improvement

- Spending on agriculture (6.9% of public spending in 2016), does not meet government commitments set out in the African Union's Maputo Declaration (10% of public spending).
- Mozambique's spending in its health sector (1.2% of public spending in 2015) does not fully meet (15%) commitments set out in the Abuja Declaration.
- In Mozambique, the law gives women and men equal economic rights and equal legal access to agricultural land. However, these laws are not effectively enforced and discriminatory practices against women continue, increasing their vulnerability to hunger and undernutrition.
- Mozambique does not have a separate budget line for nutrition; this prevents transparency and accountability for spending.
- Policymakers in Mozambique do not benefit from regular nutrition surveys that are statistically representative at national level. The last survey was published in 2011.
- Weak access to an improved source of drinking water (61.5% in 2015) and an improved sanitation facility (23.6% in 2015) prevents positive outcomes for hunger and nutrition in Mozambique.
- In Mozambique, constitutional protection of the right to social security is weak.
- Social safety nets in Mozambique are basic and only cover few risks for a limited number of beneficiaries.
- Civil registration rates are weak (47.9% in 2011) and potentially hold back children's access to critical public services such as health and education.

HANCI compares 45 developing countries for their performance on 22 indicators of political commitment to reduce hunger and undernutrition. All the countries compared in the index have high rates of hunger and undernutrition. Country scores are calculated in relation to the political commitment of the other countries in the index.

Hunger Reduction Commitment Index (HRCI)

Public spending	Score*	Year	HRCI Rank of 45
 Public spending on agriculture as share of total public spending ¹	6.9%	2016	Joint 17th
 Public spending on health as share of total public spending ²	1.2%	2015	45th
Policies			
 Access to land (security of tenure) ³	Strong	2016	Joint 7th
 Access to agricultural research and extension services ³	Strong	2013	Joint 4th
 Civil registration system — coverage of live births	47.9%	2011	31st
 Functioning of social protection systems ³	Weak	2016	Joint 22nd
Laws			
 Level of constitutional protection of the right to food ³	Moderate	2017	Joint 10th
 Equality of women's access to agricultural land (property rights) ⁴	In Law, not in Practice	2014	Joint 4th
 Equality of women's economic rights ⁴	In Law, not in Practice	2014	Joint 1st
 Constitution recognises the right to social security (yes/no)	No	2012	Joint 34th

¹ Possible scores are:  <75% of AU's commitments set out in the Maputo Declaration  >=75 % and <100%  >=100%

² Possible scores are:  <75% of AU's commitments set out in the Abuja Declaration  >=75 % and <100%  >=100%

³ Possible scores are:  Very weak/Weak  Moderate  Strong/Very strong

⁴ Possible scores are:  Not in Law  In Law, Not in Practice  In Law & Practice

Nutrition Commitment Index (NCI)

Public spending	Score*	Year	NCI Rank of 45
 Separate budget for nutrition (no/sectoral only/yes)	No	2017	Joint 35th
Policies			
 Vitamin A supplementation coverage for children	99%	2015	Joint 1st
 Government promotes complementary feeding (yes/no)	Yes	2014	Joint 1st
 Population with access to an improved water source	61.5%	2015	40th
 Population with access to improved sanitation	23.6%	2015	32nd
 Health care visits for pregnant women	90.6%	2011	Joint 23rd
 Nutrition features in national development policy ¹	Moderate	2015-2019	18th
 National nutrition policy/strategy (yes/no)	Yes	2017	Joint 1st
 Multisector and multistakeholder policy coordination (yes/no)	Yes	2017	Joint 1st
 Time bound nutrition targets (yes/no)	Yes	2017	Joint 1st
 National nutrition survey in last 3 years (yes/no)	No	2011	Joint 40th
Laws			
 ICMBMS [^] enshrined in domestic law ²	Fully Enshrined	2016	Joint 1st

¹ Possible scores are:  Weak  Moderate  Strong (Note: Performance relative to other countries)

² Possible scores are:  Not enshrined in law  Few/Many aspects enshrined  Fully enshrined

[^] International Code of Marketing of Breastmilk Substitutes
